ZHEJIANG DASHAN PUMP INDUSTRY GROUP CO., LTD.

DJZ Mechanical Diaphragm Metering Pump

Product datasheet • dashan.gwmmi.cn

The DJZ series mechanical diaphragm metering pump uses a motor drive and mechanical diaphragm design. It runs smoothly and is easy to adjust, making it suitable for continuous dosing of standard chemicals and water-treatment agents at low to medium pressure.

Key features

- Compact design, easy to install and maintain
- Stable metering accuracy with adjustable flow
- Wetted materials selectable for the medium

Specifications

Specification	Detail
Product type	Industrial metering pump / dosing equipment
Dosing principle	Positive displacement, adjustable stroke length
Wetted materials	PTFE, PVDF, 316L stainless steel (model dependent)
Control options	Manual stroke, digital controller, 4-20 mA / pulse input
Turndown ratio	Up to 1:100 with digital control
Customisation	Flow, pressure, material and explosion-proof versions on request

Typical applications

- Chemical processing
- Pharmaceutical
- Water & wastewater
- Food & beverage
- Power generation
- Oil & gas

Flow range, pressure rating, wetted materials and control method can be selected to suit the actual duty. Please contact us for detailed specifications or a quotation.
